

NR500 Series

Industrial Cellular VPN Router

4G LTE/3G/GPRS

LTE Standard for high data transmission rates and good network coverage even in sparsely populated areas.

Dual SIM Backup

High availability of 2 SIM Cards allow the usage of two different network Services and switching between freely.

Digital I/O Support

2 x DI and 2 x DO for the connection of Sensors and Actuators.

Multiple VPNs

GRE, IPsec, OpenVPN and DMVPN, Simple and fast configuration, compatible with RIP, OSPF, BGP routing protocol.

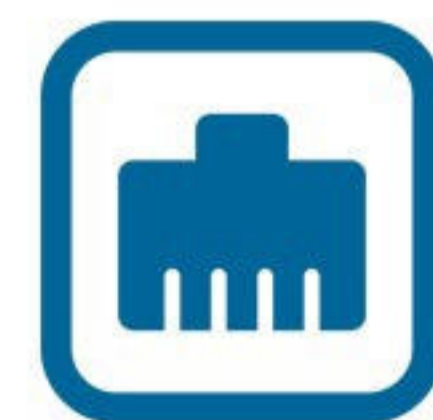

3rd Party Management Cloud

Support 3rd Party Cloud for Router and Data Management. Easy to configure and customize the Dashboards on the platform.

Wi-Fi Access Point and Client

Support WLAN standards IEEE 802.11 b/g/n, configured either Access Point or Wi-Fi Client.

2 or 4 Ethernet Ports

2 or 4 Ethernet Ports. One of them as WAN Port supporting Static IP, DHCP, PPPoE.

Serial Interfaces

Support 1 x RS232 and 1 x RS485 for the connection of other Serial Equipments.

Connection Manager

ICMP for Link Detection, Cellular, Wired and Wi-Fi WAN options. Each of them are designed to provide Link Backup.

EMC

High electromagnetic compatibility according to 61000-4 for use in high-stress environments and EN50155 vibration.

Industrial IoT Connectivity With NR500
