

Confirmation concerning RoHS, REACH and WEEE

Herewith we certify that all motrona products comply with the European Directive 2011/65/EU (RoHS II) and with the European Commission Delegated Directive EU 2015/863 (RoHS III).

Also we certify that motrona products do not contain any Substance of Very High Concern (SVHC) according to Article 33 of the European Regulation EC 1907/2006 (REACH). Motrona does not use such substances and there are no SVHC in any parts or components in our products.

Motrona products are always mounted to machines, control cabinets or operator panels and thus they are always part of a larger assembly (generally in a fixed facility) mounted, installed and de-installed by professionals. According to Article 2, paragraphs 3b and 4b of Directive 2012/19 / EU (WEEE), this WEEE Directive does therefore not apply to motrona products.

Nevertheless, in order to respect environmental protection and to provide transparency, we will gradually add waste disposal instructions on our products and in our operator manuals.

The qualification of all relevant processes affecting our value chain is provided by our quality management system in compliance with ISO 9001:2015.

If you have any queries please do not hesitate to contact our quality manager Mr. Markus Kraemer.
